CAREER OBJECTIVE

To work in an organization with full dedication and determination that helps me to achieve high career growth through a continuous learning process and earn a job which provides me self development, job satisfaction and overall growth in Technical and Professional Skills

SKILLS

- **Language :** Python, JavaScript
- **Databases :** MySQL, MongoDB
- **Worked On :** HTML, CSS, Bootstrap
- **Library :** Nodejs

CERTIFICATIONS

- Infosys Certified Software Programmer.
- Programming, Data Structures and Algorithms using Python by NPTEL.
- Data Analysis with Python by CognitiveClass.ai (IBM)
- SQL and Relational Databases 101 by CognitiveClass.ai (IBM)
- Deep Learning Specialization by Coursera (Deeplearning.ai)

TRAINING AND INTERNSHIP

- Applied Machine Learning and Data Science by IIT-Kanpur

PROJECTS

- **Task Management App (Individual Project):**
In this project, I have implemented task management using API through node js and the project is deployed onto Heroku with database connectivity using MongoDB Atlas. In this project, I have implemented multiple functionalities i.e DB management using mongoose, express js, API Authentication, Hiding Private data from users, search pagination, image, and file upload, sending emails using SendGrid, and automated testing using JEST.
Tech Stack: HTML, CSS, JavaScript, NodeJS, ExpressJS, Mongoose, SendGrid, Heroku, JEST
- **BookList App (Individual Project):**
In this project, you can perform the CRUD operation using the web browser. This project uses vanilla javascript.
Tech Stack: HTML, CSS, JavaScript
- **GitHub Finder (Individual Project):**
In this project, I have used github api to get access to its users and get their information. In this any user can use the web interface to search github users and get detail.
Tech Stack: Vanilla JavaScript, HTML, CSS, Bootstrap

- **Notes App (Individual Project):**
In this project, you can use the command line to access and perform the task on Notes taking app. This project is built using Node JS.
Tech Stack: Node JS
- **Weather App (Individual Project):**
In this project, you can get the current weather forecast using a web browser. This project uses node js server. This is hosted on the Heroku Server.
Web URL: <https://sau-weather-app.herokuapp.com/>
Tech Stack : HTML, CSS, JavaScript, Node JS, Express JS
- **HomeX (Group Project) :**
Final Year Project: Based on “Raspberry Pi and OpenCV” which focuses on the home appliance control. Appliances can be controlled from anywhere via App or Website. Door unlock is done with Face Recognition
Tech Stack: HTML, CSS, Jscript, Bootstrap, Django, MySQL, OpenCV and Android
- **Car Mileage Prediction (Individual Project) :**
This Project is implemented using Linear Regression which focuses on determining car mileage per gallon for the given features..
Tech Stack : Python, Pandas, Numpy, Linear Regression, Sklearn, and Django
- **Click Prediction in Advertisement (Individual Project) :**
This Project is implemented using Logistic Regression, KNN, Random Forest, SVM and Naive Bayes which focuses on determining if the user can click on the given ads or not for the given features.
Tech Stack : Python, Pandas, Numpy, Logistic Regression, KNN, Random Forest, SVM, Naive Bayes and Sklearn
- **Product Recommender System for E-Commerce(Individual Project) :**
This Project is implemented using K-Means which focuses on for the beginners in e-commerce, it helps them in understanding the trend of products.
Tech Stack : Python, Pandas, Numpy, K-Means, and Sklearn
- **Virtual Paint(Individual Project) :**
This Project is implemented using OpenCV in which users can use color pens to draw on a virtual canvas.
Tech Stack : Python, Numpy, and OpenCV
- **Detect COVID-19 in X-Ray Images (Individual Project) :**
This Project is implemented using the Deep Learning Concept in which users can use color pens to draw on a virtual canvas.
Tech Stack : Python, Numpy, Keras, Tensorflow, Convolution Neural Network, Transfer Learning and OpenCV
- **WebNav (Group Project) :**
Third Year Mini Project: Based on “Web Navigation Home Page” which focuses on the management function of a Home Page. This page consists of Start-Up Page, Home Page and All-in-One Web Portal for Tech Savvy. It consists of different useful website links and has access to a database to store important links on a session basis.
Tech Stack: HTML, CSS, Jscript, Bootstrap, Servlet, MySQL

EDUCATIONAL QUALIFICATIONS

Course (Stream)/Examination	Institution/University	Year of Passing	Performance
BE-Information Technology	Sinhgad Institute of Technology	2020	8.09 CGPA
HSC-PCM	SBBG Inter College	2016	78.20%
SSC	The Jain International School	2013	9.8 CGPA

INTERESTS

- FPS Gaming
- Watching Anime
- Cooking

PERSONAL VITAE

Date of Birth : 28/11/1997
Address : HN 205, Badhni Road, Itwa, Siddharth Nagar (UP)
Languages : English, Hindi
