

Saurabh Maurya

Email: iamheremaurya@gmail.com | Phone: +91-8805639108 | GitHub: <https://github.com/saurabh-maurya>

I want to work in an organization with full dedication and determination that helps me to achieve high career growth through a continuous learning process and earn a job which provides me self development.

SKILLS

- **Language :** Python, JavaScript
- **Databases :** MySQL, MongoDB
- **Worked On :** HTML, CSS, Bootstrap
- **Backend:** Nodejs

CERTIFICATION

- Infosys Certified Software Programmer.
- Programming, Data Structures and Algorithms using Python by NPTEL.
- SQL and Relational Databases 101 by CognitiveClass.ai (IBM)
- Deep Learning Specialization by Coursera (Deeplearning.ai)
- Applied Machine Learning and Data Science by IIT-Kanpur

PROJECTS

- **Chat App** (<https://maurya-chat-app.herokuapp.com>) :
In this project, I have implemented socket programming for communication between server and user. It's a real-time room-based chat app with a unique username for each chat room with no signup required, users can directly login using a username not used in the particular room.
Tech Stack: HTML, CSS, JavaScript, NodeJS, Socket, ExpressJS, Heroku
- **Task Management App:**
In this project, I have implemented task management using API through node js and the database connectivity using Mongoose.
Tech Stack: HTML, CSS, JavaScript, NodeJS, ExpressJS, Mongoose, SendGrid, JEST
- **BookList App** (<https://saurabh-maurya.github.io/book-list/>):
In this project, you can perform the CRUD operation using the web browser. This project uses vanilla javascript.
Tech Stack: HTML, CSS, Vanilla JavaScript
- **Weather App** (<https://sau-weather-app.herokuapp.com/>):
In this project, you can get the current weather forecast using a web browser. This project uses node js server. This is hosted on the Heroku Server.
Tech Stack : HTML, CSS, JavaScript, Node JS, Express JS
- **HomeX :**
Final Year Project: Based on "Raspberry Pi and OpenCV" which focuses on the home appliance control. Appliances can be controlled from anywhere via App or Website. Door unlock is done with Face Recognition
Tech Stack: HTML, CSS, Jscript, Bootstrap, Django, MySQL, OpenCV
- **Twitter Sentiment Analysis:**
In the project, I have prepared different models to estimate the sentimental analysis of the tweets obtained from Kaggle. I have used different NLP techniques to clean and filter the data.
Tech Stack: Python, Numpy, Pandas, Sklearn, Keras, NLP, and Tensorflow

EDUCATION

Qualification	Institute	Year	CGPA
BE(IT)	Pune University	2020	8.27

ACHIEVEMENTS AND INTEREST

SEED IT idol winner(14th Rank) | FPS Gaming | Drawing and Painting
